

# Q Test Special Inspection Program

Q Test's Special Inspection Program is accredited by the Standards Council of Canada and is in accordance with SPE-1000 and ISO 17020 to ensure safety and code compliance on various electrical products.

The Canadian Electrical Code mandates that all electrical equipment that is manufactured or imported into Canada must be evaluated and approved by an Accredited Inspection Body.

## ABOUT THE COMPANY

We can provide a multitude of inspection and Non-destructive Testing (NDT) services to support our clients from individual activities to provision and management of a complete program. We work with our clients to understand their specific requirements to provide cost-effective solutions with high quality results. Our inspectors can capably serve clients throughout Canada and Internationally.

## OUR APPROACH

- Developed cost controls through optimal utilization of personnel, materials, and equipment.
- We work alongside our clients to ensure that our services produce a maximum return on investment.
- We work with our clients to provide a higher quality service and can customize services to our clients needs.

## SPECIAL INSPECTIONS

Electrical Inspections and Product Labeling  
Q Test has experienced and competent Inspectors. Our Inspectors have expertise with regulations, codes and standards, safety and quality assurance. We provide services to a variety of sectors including: industria, commercial and residential.

## SERVICES AVAILABLE

- Document and Specification Review
- Code Compliance
- Equipment Evaluations
- Labeling
- Visual Inspections
- Testing

## SPECIAL INSPECTION CRITERIA

Approval on electrical equipment is required on equipment in limited quantities, modification of a certified product or any custom-built equipment.

## TYPICAL EQUIPMENT INCLUDES

- Control Panels
- Luminaires
- Pre-fabricated Electrical Buildings
- Modified Panels
- Imported Electrical Products
